

ProDesk-4™

APB-DynaSonics' ProDesk-4 small-format front-of-house consoles incorporate a wealth of professional features derived directly from the companies APB Spectra Series of consoles. Intended for use in Production, AV and Contracting applications, ProDesk-4 stresses simple operation while providing uncompromised audio quality in a compact package.

FEATURE OVERVIEW (See our website at APB-DynaSonic.com for more detailed information):

- Available in modular blocks of 24, 32, 40, and 48 Mic/Line Input Channels.
- All versions include 4 Stereo Line input channels with Split Track capabilities.
- Input channels include high quality 100mm Faders, Internally illuminated Mute and PFL switches, 6 segment channel metering, 48 Volt Phantom Power switch with LED, mic/line, Pad and Polarity Reverse switches. .
- 6 Auxiliary sends are switchable pre/post fader in pairs and pre/post EQ as a group and include 1 pair of auxiliary sends that are switchable between mono and stereo operation,
- 4 band EQ with sweepable mid-frequencies with a 1 octave bandwidth and EQ On switch with LED, Variable High pass filters with a 20Hz-400Hz with On switch with LED.
- Outputs include 4 analog subgroups, 4 matrix outputs, Left/Right, Center, and Mono (subwoofer). All include XLR Balanced output connectors, TRS pre fader insert points, and TRS Balanced bus inputs.
- Digital USB Stereo Input and Record Output.
- Remote muting of all primary outputs using a single Opto Isolated Phoenix connector.
- Spectra derived construction includes the use of mother and daughter board construction for easy service and uncompromised performance.
- Low phase shift direct coupled circuit design and extended bandwidth design.
- Plug in Power Supply (same unit as used on Spectra Consoles) for ultra reliability. An optional redundant power supply can be added to all current chassis systems.
- Depth: 23.5" Height: 8.9" Width: 24 Mono input 38.8", 32 Mono input 46.9", 40 Mono input 55", 48 Mono input 63.1"

All ProDesk Consoles are supplied with one modular Power Supply, with a second redundant power supply available as an option (except ProDesk-416). This is the same Power Supply as used on Spectra Consoles. All specifications and features are subject to change without advance notice. Please see our website at APB-DynaSonics.com for additional detailed information on ProDesk Consoles and the complete line of APB-DynaSonics mixing products.
